# **Dr. Daniel James Van Durme**

SEP 25, 1961 - MAY 30, 2023

**D**aniel (Dan) James Van Durme, MD, age 61, passed away on May 30, 2023, in Tallahassee,

FL. He was born on September 25, 1961, in Dansville, NY, to Anne and Nicholas Van Durme. Dan is survived by his wife of 42 years, Patricia, his children Felicia, Stephanie (Shawn), and Luke, his grandchildren Bella and Killian, and his siblings Norah, Jean, Michael, Claire, Tommy, Mark, Matthew, Rachel, and Patrick.

Dan was a man of many passions and interests. Above all else, he was devoted to Jesus, and his life revolved around serving Him. He was a loving husband, father, and grandfather who always put his family first. Dan loved traveling and showing the world to his loved ones. He was an avid puzzler and enjoyed hours of yard work on the weekends. Dan and Patricia shared a love of books on tape and morning Wordle competitions. They also enjoyed watching movies together on Saturday nights, and Dan even indulged Patricia's love of football, calling himself a football widower in the fall. He was the rock of his family.

Dan was a graduate of Dansville High School and earned his Bachelor's and MD degrees from the University of South Florida. While Dan spent some time in private practice, most of his career was dedicated to teaching the next generation of doctors at USF and FSU Colleges of Medicine.

He was a gifted teacher who won numerous awards and mentored hundreds of doctors worldwide. At USF, he was one of the family doctors for the Tampa Bay Lightning, Tampa Bay Mutiny, and USF Athletics.

While at FSU, he was instrumental in forming the Family Medicine Scholars and the Chapman Chapter of the Gold Humanism Society. He even made the teaching of the dreaded Evidence-Based Medicine course palatable. Under his direction, FSU Primary Health was conceived and implemented, maintaining the mission of the school to provide doctors to underserved, rural, minority, and elderly populations.

## Obituary

**Dr. Daniel James Van Durme**

SEP 25, 1961 - MAY 30, 2023

---

Dan dedicated a lot of his time to international aid work and educating family medicine doctors around the world. He ended his career at FSU as Senior Associate Dean of Clinical and Community Affairs.

Dan was well-loved by those around him and touched thousands. In lieu of flowers, please donate to Heart to Heart International.

We know he is up there in heaven singing with the angels, and maybe even in tune.

There are some people that can never be replaced, and DVD is certainly one of them. To call him esteemed & cherished is an understatement. To call him a leader & a mentor doesn't feel like it gives him enough credit. It doesn't feel like there are strong enough words in the English language for how amazing of a man & physician he was. We bonded immediately over our shared love of sports medicine. Then our similar communication styles, when he apologized in advance if he interrupted me to share a thought & I accidentally interrupted him to confess I was bad at doing the same. 'We just already know where you're going & want to take it a step further!' he'd quipped. For him it was certainly true: we all knew he was always a step ahead. I've never worked with someone as collaborative as DVD. (Nor have I known someone more brilliant.) While we shared a lot of the same visions & goals for things, we often found ourselves disagreeing on the details. But it was those disagreements I'll reminisce about the most professionally. He had the best way of either finding common ground to move forward, convincing you of his side, or listening so opening to yours that he'd drop his argument completely. It sounds so small, but it wasn't. It's so rare, yet he did it every day. It was in those conversations that I found the most joy in what we could do. In the first 2 years of knowing him, I said more times than I could count that what I loved most about my job was the true teamwork we had between the medical & the administrative sides. It was in the midst of COVID that he gave me what I still consider one of the biggest compliments I've ever received. He joked for a long time when we first met, as I'm sure he did with others, about one day being called by POTUS to come serve as the Surgeon General. (And while he joked, I truly would not have been surprised in the least had that happened.) One day I joked back with him that I'd been trying to figure out how to ride his coat tails when that happened & I'd finally figured it out - I'd have to scheme and trick him into letting me be his Chief of Staff! A few laughs and we moved on. But a few weeks later, during one of our evening protocol planning sessions, we were trying to figure out the best way to run a few hundred people through a vaccination drive-thru with 2 days notice. We planned the whole thing out and hung up. A few minutes later I got a text from him: "by the way, if I became surgeon general, I would hire you as my chief of staff!" I don't think he even realized how big of a compliment that was. To be acknowledged in even the smallest way by someone as accomplished & admired as he was, makes you instantly feel worthy. And that is the epitome of who he was - it didn't matter who you were, he made it known that your time & voice was as valuable as his. As evidenced by so many other tributes being written right now, he somehow made time for every person that needed it, and while listening, validating & giving you feedback, also made you want to be a better person each day. DVD was brilliant (again, an understatement). He was kind. Inspiring. Compassionate. Hilarious. A paragon of so many characteristics that I would aspire to be. The eternal optimist, somehow even when he was feeling pessimistic. He gave all he had to bettering the world, to increasing access to healthcare for those that needed it. He inspired & taught not only generations of physicians, but I'm sure generations of his coworkers as well, to go out & do amazing things. To be amazing, compassionate people that could each change the world in their own way. (cont' in comments)

I will be forever grateful for his friendship, wisdom, & collaboration. From the late night/early morning planning phone calls we shared every time a new advisory changed at the start of the pandemic, to the joking memes sent on particularly trying days or mid-meeting, knowing he was in it all with me was the only thing that made some of the hardest days a little easier. I'll miss joking with him, laughing with him, planning with him (and maybe a little scheming with him), arguing with him, and just being in his presence in an attempt to soak up some of the amazing person he was. I will grieve the thousands of things I had yet to learn from him & the hundreds of plans we'd already made that he now won't be here for. To the man that never hesitated to tell me how much he appreciated me when he could see I was barely scraping by. Who always asked, "what can I do to make your life easier today?" And didn't just ask to ask, but truly wanted to know how he could help. To the man that I truly believe must have somewhat mentored everyone he ever met (as evidenced by all the comments & stories shared). DVD truly shaped so much of the world that so many of those that never met him or heard of him have been affected positively by him. I'm thankful for all he's done & I grieve for all of the good he still could have done if he were still here. I've often said jokingly to people that I question my life choices when I think back on changing jobs away from a specialty practice in order to start managing a brand new primary care practice less than 7 weeks before a pandemic broke out. But looking back, just the chance to meet, work with, & befriend DVD will never have me questioning that again; he made it all worth it. For everyone that was lucky enough to know you, we all grieve alongside your family and will miss you wholeheartedly. I'll do my best to carry on what you started where I can, and always work to better the world when it's in my control, in honor & in memory of you, inspired by you.

**Neha Saini** posted:

Dr. Van Durme was the ultimate role model. The best physician, mentor, and human being. What a gift it is to have learned from someone who embodied everything that one hopes to be as both a doctor and person. His passion for medicine was obvious in the enthusiasm he taught with, but his love for people was even more evident. Though he was often leading incredible projects and held numerous prestigious positions, there was never a time that he did not make himself available to help those around him. I have never met someone more committed to serving and uplifting others. His mentorship served as one of the most defining and crucial parts of my medical journey. Thank you for all that you did for your community. Thank you for your unwavering belief in me. Your legacy lives on in the thousands of students you inspired through your life. Here's to living a life worthy of the example you set for us all, promise to make you proud DVD. Rest in peace 🙏

DVD, I remember meeting you for the first time as a PGY-1 at TMH FMRP about 20 years ago. Our discussions continued beyond residency as you were instrumental in advising me throughout my career decisions including joining FSUCOM as a preceptor and then later as a CLC faculty. You taught me invaluable lessons, not just about clinical decision making but also about how to own my profession and thrive in it with compassion, positivity, and authenticity. I always knew that you are a call or a text away and that I can count on you for the most honest, educated, and sincere advice. I can't believe you are not with us anymore, probably because I feel your presence everywhere at FSUCOM. I can see your everlasting impact through the lives you touched in our community, through your students who have graduated already and are advancing your mission and vision throughout the world and through my colleagues and friends all around me who are deeply affected by our loss. I will be forever thankful to God for crossing our paths and for the privilege of knowing you and learning from you. Lots of love and prayers for Pat and family. May you all find peace and comfort through his loving memories, his legacy and through the prayers and support of your global family who loved him.-Nighat Ahmed

Dear Pat and the Van Durme Family, I am sending my heartfelt condolences to you all, even as we are all trying our best to process Dan's passing, a passing that indeed leaves us in utter shock and disbelief. An incredible clinician-educator, a loving family man, the noblest of teachers, the kindest of community leaders, a true catalyst in health systems, a nurturing mentor, and a dynamic humanitarian. A role-model for countless learners and colleagues to emulate, for all that Dan accomplished and the greatness that he manifested during his life-journey on earth. I first knew him as a "senior" at USF College of Medicine, having myself graduated in the Class of 1987, with a strong focus and affinity for his beloved specialty of Family Medicine, and that too inspired by Dan and his colleagues and teachers. For me, then and throughout his career, Dan represented that rare mix of the ultimate compassionate, good-humored, enthusiastic, plain-speaking, wise, pragmatic, and brilliant "Doctor's Doctor" – an individual who represented everything that was "right" with Medicine as both science and art. I recall our conversations with such joy, and I know I will forever miss hearing his voice, laughing with him, listening to his commentary, and learning from his insights and perspectives. I wish that Dan's grounded Presence will forever be with you, taking you even beyond the happy memories, and strongly supporting you through your grief and tears. With deep love and prayers, Asim Jani MD MPH Lake Mary, FL

Rest in Power, DVD! ☐☐I reflect fondly on being in a M1 or M2 small group with DVD and working through clinical cases or him being a preceptor during our OSCE exams. DVD was a #familyphysician with the biggest heart ❤️ In honor of DVD I plan to carry forward: his hospitality in inviting students to his home to partake in dinner or a bonfire 🔥 (though he had this amazing way of chopping logs and creating stumps that burned from the inside out that I know I cannot replicate). His investment in helping students find their passion— though I'm not a family med doc, the lessons and discussions of Family Med Scholars are things I carry with me into patient encounters. His and Dr. Stein's investment in our group and monthly meetings amidst their busy clinical practices is something I can aspire to as a faculty member. DVD was committed to serving the underserved both in Tallahassee and Nicaragua and his gift of organ donation further extends how much he gave. Looking forward to donating to the scholarship in his honor, and grateful I was able to learn from this exemplary physician 👤 Rest in power, Dr. DVD!

**Robert Campbell** posted:

How do you even begin to try to write a tribute to such a wonderful man? I first met Dan when he was a faculty instructor in the beginning of my medical school. He was one of the greatest influences on me to pursue family medicine. Me and so many of my students were simply in awe of him as anybody who has had the pleasure to meet him are. Such energy, such love, compassion, leadership. Dan then went on to private practice during the latter part of my medical school. I went on to residency and had the pleasure of joining USF as faculty where Dan had just rejoined faculty. He immediately took me under his wing and became my mentor and more so my friend. Dan was so passionate about so many things, and I yearned to be a thousandth of what he was for students. I hear from so many, many other people the same sentiment of the impact that DVD had on them and their careers – he always had time for everyone, and I don't know how. I met his family and fell in love with all of them including his incredible wife Pat. He continued to be a leader, no, a Paragon for Family Medicine and patients and students. We covered sports medicine together for many years including the USF football team, Tampa Bay Lightning, Tampa Bay Storm, and the Tampa Bay Mutiny. All the while he would mentor me through promotion and tenure. It was that time I learned that he was a true renaissance man. His knowledge on so many topics was incredible. We enjoyed deep talks and talking about movies and books. DVD then decided to come to FSU COM and I joined him here 2 years later and had the pleasure of DVD being not only my mentor, my friend and my boss as well. His greater than life attitude just grew even more. We would often have talks about my future, but he would share things about his future aspirations. We would occasionally see blockbuster movies together. I would often go to his house to cut firewood and he would generously give me some of it for my family. We played board games together. He was always there for a consult on a patient and his knowledge was incredible. We stood together at the top of volcanos over open pits of lava many times in the 15 trips to Nicaragua that I went on with him where I saw his unmatched passion for serving the underserved locally and globally and more importantly his serving our Lord. He would often invite me over to watch sports with him and Pat. His renaissance continued to show when he taught me the intricacies of good coffee making, plant keeping, his love for dogs, his wood working, and his love for God. We brewed beer and wine together. We had arguments on which was older in history, beer or wine. We competed on having the latest technology like who had the latest iPhone or tablet. He stood by me through very difficult times. So many other things. Who could ask for a better friend and human being? I know for sure that God never delights in suffering and that things happen for reasons beyond our world understanding but I know things occur for the greater glory of God. Through this, I am rededicating myself to emulate you as much as I can DVD, to serve patients and students, to be an advocate for Family Medicine and to be a kind loving friend to many. I love you DVD and will be so happy when I am to be reunited with you at the feet of our Sovereign Father.

DVD, I have to write to you, because I still can't process that I can't just pick up the phone to text you. Words don't measure the impact you've made in the world, in our community, in our lives, and in my life. You have left us with teachings that have shaped our very being- so ingrained now in my DNA that I can't even remember the me before having you as a mentor and guide. I remember being in medical school, in a new demanding journey and away from my family, and by the grace of God you were assigned as my advisor. You were the angel God sent me to get me through the calling He had given me. So many times I found strength, comfort, and guidance from you- your door was always open, and there was always a box of Kleenex on your desk. Thank you for always being there, you always made time for all of your students. You made FSUCOM feel like home. So many memories- from receiving my white coat from you, going to the gigantic bonfire at your house, the many health fairs, visits to the homeless shelter, global health trips to Nicaragua, clinical lectures, learning from you about leadership, and finally graduation. I remember crying when I said good bye, but it was not goodbye, you were still just a text away whenever I needed guidance or help. No matter how many years had passed, you were still my mentor and you always will be. The Kenya wedding sculpture you gifted Julian and me for our wedding, has been right in the middle of our living room now for 9 years, constantly reminding us of the vow we made before God of becoming one. In every way you knew just how to make a difference. Thank you for all you have done and for all that you have been. Your life is a reflection of God's love for mankind and the way He wants us to serve others. Thank you for following the calling He had for you. You have been His good and faithful servant. No matter the many titles and hats you wore, you were always humble, kind, and ready to serve. I know I thanked you many times, and today I thank you one last time. Once again I find myself in tears having to say goodbye... but I am trying to remind myself that it's not really goodbye, because one day we'll say hello again in heaven. -Melissa Velarde
